EXCITING NEWS!!!

LEASING IS NOW AN OPTION FOR AERCO HIGH EFFICIENCY, CONDENSING BOILERS

Now your customers can get the high efficiency Aerco Boilers and use the savings they will see to help make their lease payments. We have contracted with Wells Fargo Financial Leasing for some very competitive rates for a zero down, \$1.00 buyout lease with terms of three, four or five years.

All you need to do is contact your account manager at R. M. Cotton Company to obtain the monthly lease payment for the boiler or boilers with a boiler management system for your particular application. We can help with sizing the boilers. We can also help size the associated pumps and accessories if any are required. Pumps and accessories are not included in this leasing program.

All your customer needs to do is fill out a credit application from Wells Fargo. Wells Fargo promises a quick response to the lease requests.

This program may help you to reach those customers that do not have all the up-front money they need to upgrade their boiler systems. Schools, hospitals and nursing homes may have a high interest in this leasing option.

It is our intent with this program to give you more tools to increase your boiler replacement business.
